$$9 + 6 = \square$$

A diagram showing the addition of 9 and 6. The number 9 is on the left, and the number 6 is on the right. A horizontal line connects the 9 to a square box below it. A vertical line connects the 6 to a square box below it. A horizontal line connects the two square boxes below them.

$$9 + 5 = \square$$

A diagram illustrating the addition of 9 and 5. The number 9 is on the left, and 5 is on the right. A horizontal line is drawn below the 9. A vertical line is drawn from the top of the 9, goes down, then right, then down again to the horizontal line. A bracket is drawn above the 5, with two lines extending down to two empty square boxes. Another empty square box is to the right of the equals sign.

9 + 4 =

8 + 8 =

$$8 + 7 = \square$$

A number line diagram for the addition $8 + 7 = \square$. The number 8 is at the top left. A vertical line goes down to a box, then a horizontal line goes right to another box, then a vertical line goes up to a third box. Above the third box is a bracket with two boxes below it, representing the addition of 7.

$$8 + 9 = \square$$

8 + 6 =

$$8 + 5 = \square$$

A diagram showing the addition of 8 and 5. The number 8 is on the left, and the number 5 is on the right. A horizontal line connects the 8 to a square box below it. A vertical line connects the 5 to a square box below it. A horizontal line connects the two square boxes below them.

5 + 6 =

4 + 9 =

$$4 + 8 = \square$$

4 + 7 =

3 + 9 =

$$3 + 8 = \square$$

Diagram illustrating the addition of 3 and 8. The number 3 is on the left, and 8 is in the middle. A horizontal line connects the 3 to a vertical line that goes down to a square box. Another vertical line goes down from the 8 to a square box. A horizontal line connects these two boxes. A diagonal line goes from the top of the 8 to a square box above the horizontal line connecting the two boxes.

$$2 + 9 = \square$$
